Bilingual educational tablet Paw Patrol Lexibook

Ref: 3380743098098

Bilingual educational tablet Paw Patrol Lexibook

The Lexibook bilingual educational tablet is an excellent choice for any child who wants to develop their language and math skills in the company of their favorite characters from Paw Patrol. The device is designed for children who are at least 3 years old. It requires 3 AAA/LR03 1.5V batteries, which are included in the set.

Learning the alphabet and numbers

The tablet offers the possibility to learn letters and numbers in two languages (Polish and English). Thanks to the intuitive interface, the child easily assimilates new information. Buttons with letters and numbers are illustrated with pictures, which further helps in memorization. Simply press the button to hear the selected letter or number, which significantly supports phonetic development.

Discovering new words

The word discovery function allows you to learn new words in both languages. By pressing the appropriate button, the tablet pronounces the selected word, and the child can repeat and consolidate it. In this way, the device contributes to the development of vocabulary and communication skills.

Interactive quiz mode

The interactive quiz mode makes learning even more engaging. The tablet asks questions and waits for the child's answer, teaching through fun and interaction - a great way to test knowledge and skills.

Musical touch

The Lexibook tablet also helps develop a child's musical sensibility. Buttons with instruments allow you to listen to different sounds and melodies, a great introduction to the world of music.

Ease of use

The device allows you to easily change the language, which is extremely convenient for bilingual families. In addition, dedicated buttons allow you to adjust the volume level.
