

Movable xTool Slide Extension Base for xTool F1

Ref: 6928819519565

Movable xTool Slide Extension Base for xTool F1

The xTool Slide Extension moving base for the xTool F1

The xTool Slide Extension opens up a new dimension of creation for you with the xTool F1 laser. More than an accessory, it's your new concept tool that surprises you with its simplicity: just plug it in and you're good to go. Its impressive size is like an invitation to a world where any project, even the most demanding, becomes real, giving you the freedom to create without the limitations of space.

When precision is a priority

The xTool Slide Extension is synonymous with precision, where every millimeter matters. The calibrated rulers work perfectly with xTool Creative Space software, giving you full control over every detail of your project. And with the focusing system familiar from xTool F1, every movement is predictable and precise, making perfect finishing the standard rather than the exception.

Perfection in every detail

The xTool Slide Extension's state-of-the-art cutting panel is a guarantee that your creations will be finished with incredible attention to detail. Perfectly designed airflow ensures that every cut is clean and smooth. With your convenience in mind, the base is equipped with clamps and dual scaling, eliminating the need for recalculations. And the intuitive, one-button operation promises that comfort will accompany you from the beginning to the end of the creative process.
