

Flextail Evo Pump 3 portable pump

Flextail Evo Pump 3 portable pump

Ref: 6975755964416

Flextail Evo Pump 3 portable pump

The Flextail Evo Pump 3 portable pump is a practical device that combines performance, versatility and compact design. It allows not only pumping, but also deflating, and thanks to the built-in battery it works wirelessly. Say goodbye to tangled cables! The kit also includes 5 nozzles and a carrying case.

Speed and efficiency

The Evo Pump 3 demonstrates impressive speed, allowing you to inflate a mattress in just about 12 seconds, and a pontoon in about 2 minutes and 29 seconds. Such efficiency is due to the power of the device, which generates a pressure of up to 5 kPa and an air flow of 1,000 l/min. Forget about the long wait!

Many applications

You will also find 5 different nozzles in the kit, which makes the pump extremely flexible in use. You will successfully use it for various tasks - it will easily inflate not only mattresses and pontoons, but also, for example, pool toys. Note: the Evo Pump 3 model is not suitable for inflating balloons, tires and balls.

Lightweight and portable

The Evo Pump 3 pump is extremely light and portable - it weighs only about 349 g. In the package you will also find a practical case, which will further facilitate its transportation. So you can easily have it always at hand - it will be perfect, for example, on a camping trip, in the mountains or during family trips to the water.

Powerful battery

Free yourself from cables and enjoy the convenient operation of the pump. The Evo Pump 3 is powered by a 1300 mAh rechargeable battery, which provides about 20 minutes of continuous operation. This allows for repeated use without recharging, which is invaluable for longer trips without access to electricity. To charge the device, simply use the included USB-C cable.

Included

Pump
Nozzle x5
USB-C charging cable
Carrying case

Manufacturer Flextail
Model EVO PUMP 3-B
Pressure 5 kPa
Air flow rate 1000 l/min
