

Stainless Steel Pet Water fountain & Feeder 2in1 3.2l Rojeco

Ref: 6975116293698

Stainless Steel Pet Water fountain & Feeder 2in1 3.2l Rojeco

2 in 1 Cat drinker + bowl 3.2l Rojeco

Now you only need one device to provide your pet with access to fresh, clean water and delicious food. Rojeco's 2-in-1 cat drinker and bowl is made of high quality 304 stainless steel, making it fully safe for health and durable. It offers two separate compartments (for drinking and food), and is distinguished by its 3.2-liter capacity and quiet operation. It also has a built-in faucet, which keeps the water flowing.

Various applications

The drinker is equipped with two separate chambers, making it ideal for different applications. For example, you can put food in one and drink in the other, or pour water into both. The decision is up to you!

304 stainless steel

The fountain is made of 304 stainless steel, which makes it very durable, resistant to damage and safe for pets. It does not cause the proliferation of bacteria and does not contribute to cat acne problems. So you can take even better care of your pet's condition! You also do not have to worry about problems with cleaning the drinker. The device is very easy to assemble and disassemble, and its feeder and water tank can simply be washed under the tap or in the dishwasher.

4-stage filtration

Ensure your pet has access to fresh, clean and safe water. The Rojeco drinker uses 4-stage filtration to effectively eliminate contaminants. High-density filters trap hair and dust, an ion-exchange resin filter eliminates heavy metals, and an activated carbon filter removes odors and chlorine residue.

Drinker with tap

The water in the watering hole pours from a special tap, which means it is in constant motion. This makes it perfect for attracting pets' attention and encouraging them to drink. So you can avoid problems associated with dehydration of your pet. In addition, this solution keeps the water fresher for longer.

Capacity of 3,2 l

Frequent refilling of water is a thing of the past. Rojeco drinker is distinguished by its capacity of as much as 3,2 l - such a large amount is enough even for 1-2 weeks. So you can go on a short trip or go to a party with peace of mind. Do not worry that your cat will not be able to drink! What's more, when there is little water left in the tank, a red light will automatically come on to remind you to refill it.

Thoughtful design

You don't have to worry that the fountain will stress your pet or disturb your peace. The device works extremely quietly - its volume level does not exceed 20 dB. That's almost the same as that of a whisper or the sound of leaves! The drinker also uses a low voltage of 5 volts, making it completely safe for pets.
