Avatto IPC-OD-02 Wi-Fi 4MP Intelligent Camera

Avatto IPC-OD-02 Wi-Fi 4MP Smart Camera

Avatto IPC-OD-02 is an advanced outdoor surveillance camera that offers high image quality and a wide range of features to enhance security. With 4MP (2560x1440P) resolution and intelligent features such as automatic motion tracking, the camera is an excellent choice for those looking for a reliable and efficient surveillance system.

Exceptional image quality and wide viewing angle
The camera is equipped with a CMOS sensor that captures images at 4MP (2560x1440P) resolution. The 3.6mm focal length lens and 115° (D) / 96° (H) viewing angle allows the camera to cover a large area, increasing the effectiveness of surveillance and capturing every detail.

Intelligent motion tracking
The camera supports automatic motion tracking, which means it can automatically rotate horizontally up to 355° and vertically up to 90° to follow moving objects. This ensures that no movement escapes the camera's attention, greatly increasing the level of security around your property.

Stable wireless connection

Mobilemax - Gadgets and Accessories
Rua Vasco da Gama n61, 8005-411, Estoi - Faro, Portugal

Email: info@mobilemax.pt

With support for 2.4GHz Wi-Fi, the camera provides a stable connection without the need for network cables. This allows for easy installation and eliminates the hassle of pulling cables, which is especially beneficial for outdoor installation.

Night vision and color images at night
The Avatto IPC-OD-02 camera is equipped with 6 white LEDs and 6 IR LEDs, providing night vision of up to 12 meters. With the color night vision feature, you can enjoy clear and detailed images even in low-light conditions.

Two-way communication features
The built-in microphone and speaker allow two-way communication between the camera and the phone, which is useful in situations that require voice intervention. So you can not only monitor, but also respond to events in real time. Such a solution increases the functionality of the device both in everyday situations and in case of unexpected intrusions on the property.

Advanced recording and storage features
The camera supports 7x24H recording and data storage on a MicroSD card with a capacity of up to 128GB. In addition, there is TUYA cloud storage for added security and access to recordings from anywhere.

Weather resistance
The camera's IP65-rated housing provides water and dust resistance, making the camera ideal for harsh weather conditions. It can operate in temperatures from -20°C to 60°C and in humidity from 20% to 95% without condensation.

Included
Smart camera x 1 pcs.
Wall screws x 1 set
Quick start manual x 1 piece.
