Portable mosquito repellent 3-in-1 Flextail Tiny Repel (black)

Flextail Tiny Repel 3-in-1 Portable Mosquito Repellent (black)

Flextail Tiny Repel combines the functions of a mosquito repellent, flashlight and powerbank in one compact device. It provides effective protection against mosquitoes in two modes: Camping and Outdoor. Thanks to its fast heating (110°C in about 50 seconds and 165°C in about 2 minutes), it will be ready for action almost immediately. It is also distinguished by its long operating time and IPX5 water resistance. It's the perfect choice for anyone looking not only for effective protection, but also for a portable light source and extra power for their outdoor adventures!

2 operating modes for optimal protection

The Flextail Tiny Repel Portable Mosquito Repellent offers two modes of operation for optimal protection depending on the environment and user needs. Camping Mode generates heat up to 110°C and features a range of about 3 meters - ideal for quiet rest in smaller spaces. Outdoor Mode, on the other hand, extends the range to 9 m at 165°C, which is ideal for activities in larger areas. Whether you're camping, fishing, hiking or barbecuing with friends - with Flextail you'll forget about mosquitoes in these and many other situations!

Built-in flashlight

Tiny Repel not only protects against mosquitoes, but can also act as a flashlight. The device allows you to choose from four levels of light brightness (50 / 100 / 200 / 400 lm), allowing you to adjust the lighting to your current needs. This is especially useful during evening

outdoor activities or at night on a camping trip.

High-performance rechargeable battery

Forget about tangled cables. The repellent is powered by a 4800 mAh rechargeable battery that allows up to 10 hours of continuous operation in Camping Mode and up to 7 hours in Outdoor Mode. Don't be afraid of having to recharge it frequently! In addition, Tiny Repel can serve as a powerbank, with which you can easily charge other mobile devices. This solution will come in handy especially during longer trips without access to power sources.

Improved design

The Tiny Repel portable repellent measures just 36 x 36 x 145 mm and weighs about 148 g, which makes it easy to carry and doesn't take up too much space. Its IPX5 water resistance allows you to use it even in harsh conditions, and its built-in magnet, handle and 1/4-inch hole allow it to be conveniently mounted in various places, such as on metal surfaces or tripods.
