

## Selfie lamp Neewer VL67C RGB LED 5W

Selfie lamp Neewer VL67C RGB LED 5W

Ref: 6976831838324

### Neewer VL67C RGB LED 5W selfie light

The Neewer selfie light with Bluetooth module allows you to wirelessly control a single light source or multiple LED lights from the NEEWER app. It also offers smart features such as RGB mode, music synchronization, and 17 lighting effects. In addition, it remembers your last settings, so you can get it ready to work again in no time. Thanks to its lightweight and compact design, you can take it on the go.

### One lamp - many possibilities

The lamp offers 94 LED beads with a total power of 5W, offering brightness of up to 450 lux at 0.5m. You can also choose from 36,000 colors, and the high CRI of 97 ensures accurate color reproduction without flickering. You will successfully use the product for selfie, vlogging, live broadcasting, recording on TikTok/YouTube platforms, etc. The recommended distance of the lamp is 1.5 meters.

### Easy operation and smart features

The Neewer lamp offers precise light adjustment for custom lighting scenes. Adjust the color temperature from 2500K to 8500K in CCT mode, use the built-in GM adjustment for color calibration or HSI mode for fine-tuning hue, brightness and saturation. There are also 17 lighting effects at your disposal, including fireworks, pulsating light or candle flame. In addition, the OLED display and convenient buttons make it easy to operate the device.

Up to 110 minutes of operation

The Neewer VL67C is equipped with a lithium battery with a voltage of 3.7 volts and a capacity of 2000 mAh, which translates into about 110 minutes of operation at 100% brightness. In turn, charging the lamp will take about 100 minutes. The task will be facilitated by a USB-C port (5V/2A). Enjoy reliable lighting and don't waste time on long charging.

Wide compatibility

The included cold-shoe mount works with the 1/4" side threads on the rear clip, allowing you to attach the light to your camera, tripod, etc. Meanwhile, the front clip fits phones, tablets or laptops, allowing you to film without blocking the front camera. You can also adjust the position of the light up to 160° on the front and back.
