

Cadence speed sensor Cycplus C3 - compatibile with Wahoo, Z

Ref: 6976297860051

Cadence speed sensor Cycplus C3 - compatibile with Wahoo, Zwift, Endomondo, Mapmyride etc.

Cycplus C3 cadence and speed sensor

Do you cycle often and want to track parameters such as cycling speed or pedaling frequency? Stock up on a Cycplus C3 sensor! The device provides precise measurements, and is easy to install and waterproof to IP67. It also supports Bluetooth 5.0 connectivity and ANT+ protocol.

Precise measurements

The Cycplus C3 cadence and speed sensor provides exceptional precision measurements. Find out how fast you're riding, or learn about your pedaling frequency - by analyzing the information obtained in this way, you'll get a better idea of your riding style and track the progress you've made!

Long operating time

One CR2032 battery (included) is enough to power the sensor. Do not be afraid of the need to replace it quickly - the working time of the device reaches up to 300 days. That's almost a year of tracking the parameters you are interested in during your next bike trips!

Thoughtful design

Thanks to the included accessories you can easily attach the sensor to your bike. The device is also distinguished by its IP67 water

resistance - you don't have to worry about damaging it if you get caught in the rain during your workout!

Wide compatibility

The sensor supports the ANT+ protocol and Bluetooth 5.0 technology, so it seamlessly connects to bicycle computers, smartwatches and phone apps. So you can conveniently synchronize the information obtained with it and monitor your progress in real time!

Included

Cadence and speed sensor CR2032 battery (installed in the device) Rubber pad x2 Eraser x2 User manual

Manufacturer Cycplus Model IC3 Bluetooth version 5.0 ANT+ compatibility Yes Power supply 1x CR2032 battery Operation time Approx. 300 days Waterproof IP67 Dimensions 38 x 29.5 x 9.5 mm
