## Bike Computer Coospo BC26 compatibile with z: Strava, Traini

Ref: 5906168434181

Bike Computer Coospo BC26 compatibile with z: Strava, Trainingpeaks etc.

Coospo BC26 bicycle computer

Meet the Coospo BC26, the smallest and simplest GPS bicycle computer designed specifically for beginning cyclists. With an integrated, aerodynamic design, intuitive buttons and precise GPS+BEIDOU positioning, the BC26 provides everything you need to get started on your bike. Compact and lightweight, with a long battery life, the BC26 is the perfect choice for anyone who wants to track their achievements on the bike.

Elegant design and intuitive operation

The BC26 features a uniform, streamlined design inspired by the aesthetics of minimalism and cycling aerodynamics. Three intuitive buttons located on the edge of the case allow full control of the device, providing ease of use and convenience while riding. Lightweight and compact, weighing just 54 grams, it is easy to mount and does not interfere with your ride.

Easy-to-read display with automatic backlighting

The BC26 features a 2.3-inch display with automatic backlighting that provides excellent readability in both bright sunlight and low-light conditions. This makes it easy for you to monitor your data during any ride, regardless of lighting conditions.

Dual GPS and BEIDOU positioning

The BC26 uses dual GPS and BEIDOU positioning to provide precise location and registration data. When turned on, the device automatically searches for GPS and Beidou signals and calibrates the time, ensuring reliability and accuracy. Note: Remember to charge the device before using it for the first time and look for a GPS signal in an open area.

Synchronization with Strava
With the CoospoRide app, you can easily synchronize your activity data (.fit files) with the Strava app. CoospoRide also allows you to easily configure the BC26, analyze your ride data and update the device's software. It's a great tool for anyone who wants to track their progress and analyze their performance.

Speed alert and long run time
The BC26 allows you to set a maximum speed, beyond which the device will sound a warning tone. This is perfect for those who want to control their speed and ride more safely. The BC26's rechargeable battery provides 20 hours of continuous GPS-enabled operation, which is sufficient for long bike trips. Charging time is only 2 hours, allowing you to quickly prepare the device for your next trip.

IPX7 water resistance
The BC26 is IPX7 waterproof certified, which means it is splash-proof. This means you can ride without worrying about rain. Note: Avoid submerging the device in water or exposing it to very harsh weather conditions.

Included
Main unit of the BC26 device
USB cable
Bike mount
User manual
Screen protector
Silicone eraser
Rubber mat
Mini allen wrench
