

Chest Heart Rate Monitor Coospo H808S-W compatibile with Str

Ref: 5906168434204

Chest Heart Rate Monitor Coospo H808S-W compatibile with Strava wahoo, mapmyfitness etc.

Coospo H808S-W heart rate monitor

Meet the Coospo H808S-B, an ideal chest heart rate sensor that connects to a variety of Bluetooth and ANT+ workout devices. With real-time heart rate monitoring, the H808S helps you adjust your exercise intensity and maintain optimal training status during any activity. By wearing the H808S on your chest, you can train healthier, more actively and gain control over your workout data.

Comfortable wearing and precise heart rate tracking

The H808S is equipped with a soft textile chest strap that perfectly conforms to the shape of your body for full freedom of movement during your workout. With a lighter and thinner design, the H808S offers exceptional wearing comfort. Coospo's state-of-the-art heart rate recognition algorithm guarantees precise real-time monitoring during running, cycling or other aerobic exercises. Real-time data allows you to improve your performance and shows you what else you can improve.

Bluetooth and ANT+ connectivity

The H808S is equipped with Bluetooth and ANT+ technology, so it can work with smart fitness equipment, GPS watches and cycling computers, as well as popular fitness apps such as CoospoRide, Wahoo Fitness, Adidas Run, Peloton, Zwift and many others. So you can monitor your heart rate during different activities and on different devices, enjoying versatility and convenience.

Long run time and easy operation

The H808S uses a replaceable CR2032 battery that provides up to 300 hours of operation. An integrated LED light and buzzer indicate the device's operating status - a blue light indicates a Bluetooth connection, and a green light indicates no connection. This way you always know if the device is working properly.

Compatibility with various devices

The H808S heart rate monitor is compatible with GPS watches, bicycle computers and fitness equipment such as treadmills, spinning bikes, rowing machines and more. You can easily pair it with your device to monitor your heart rate and analyze the data after your workout.

Works with the CoospoRide app

Once the H808S is paired with the CoospoRide app, you can monitor your heart rate in real time while cycling. Your heart rate data is saved in the CoospoRide app, allowing you to analyze it later and track your progress. Taking care of your form has never been so easy!
