### Coospo H6 Heart Rate Sensor

Meet the Coospo H6, a high-performance and affordable chest heart rate sensor that connects to a variety of workout devices via Bluetooth and ANT+. With precise, real-time heart rate monitoring, the H6 will help you adjust your exercise intensity and maintain optimal training status during any activity. Whether you're running, biking or using fitness equipment, the H6 provides top-notch support.

### An essential for better workout performance

With real-time heart rate readings from the H6, you can not only adjust your exercise intensity for better performance, but also prevent potential sports injuries. Precise heart rate monitoring allows you to better manage your efforts and achieve your training goals.

### Precise even during intense exercise

A proprietary algorithm developed by Coospo eliminates interference from movement and sweating while monitoring heart rate. It provides accurate readings even during intense exercise, making the H6 an ideal tool for those engaging in demanding workouts.

### Compatibility with various sports devices

Using standard Bluetooth and ANT+ technology, the H6 can connect to a wide range of smart devices such as GPS cycling computers, fitness equipment and smartwatches. In addition, it is compatible with popular cycling and running apps, making it a versatile tool for

any athlete.

#### Waterproof and dustproof

The H6 sensor is IP67 certified, which means it is water and dust resistant, so you can train without worrying about weather conditions. The H6's reliability makes it an ideal companion in all conditions.

#### Wearing comfort and long working time

The soft textile chest strap ensures comfortable wearing and full freedom of movement during training. With a replaceable CR2032 battery, the Coospo H6 offers up to 300 hours of operation, which means you can use it for a long time without having to change batteries frequently.

#### Included

H6 heart rate monitor x 1

Heart rate strap x 1

User manual x 1
