

Armband Heart Rate Monitor Coospo HW9 compatibile with Strav

Ref: 5906168434242

Armband Heart Rate Monitor Coospo HW9 compatibile with Strava , wahooo, mapmyfitness etc.

Coospo HW9 Heart Rate Monitor

Meet the Coospo HW9, an advanced wristband heart rate monitor that helps you optimize your workout by using precise heart rate monitoring and indicating its zones with a 5-color LED indicator. With Bluetooth 5.0 and ANT+ technology, the HW9 connects to a variety of fitness devices and apps, giving you full control over your workout intensity and improved performance.

Workout in heart rate zones

The HW9 features a 5-color LED indicator that tells you your current heart rate zone. This makes it easy to monitor your heart rate and adjust the intensity of your workout without having to check your smartphone. This allows for a more efficient and informed workout, helping you reach your goals faster and safer.

Accurate real-time heart rate monitoring

The HW9 uses the third generation of optical heart rate sensors and an advanced algorithm that provides precise heart rate monitoring with ± 1 bpm accuracy in real time. Whether you're running, biking or doing other aerobic sports, the HW9 provides accurate data to help optimize your workout.

Compatibility with a variety of sports devices

With Bluetooth 5.0 and ANT+ technology, the HW9 can connect to GPS watches, cycling computers, fitness equipment and apps such as CoospoRide and Heartool. It supports simultaneous connections to two Bluetooth devices for added versatility and convenience.

Comfortable wear and IP67 water resistance

The HW9 armband is designed for maximum comfort during workouts. The lightweight and ergonomic design ensures full freedom of movement, even during intense workouts. IP67 certification means the HW9 is water and sweat resistant, making it ideal for training in any conditions (not suitable for swimming).

Long runtime

The HW9 is equipped with a 90 mAh lithium battery that provides up to 35 hours of use on a single charge. Magnetic USB charging makes charging fast and convenient. Note: it is best to use a DC 5V power adapter or a USB port on your computer to charge the device.
