

Speed and Cadence Sensor Coospo BK805 compatibile with Wahoo

Ref: 5906168434259

Speed and Cadence Sensor Coospo BK805 compatibile with Wahoo, Garmin, Bryton etc.

Coospo BK805 cadence and speed sensor

Meet the Coospo BK805, an advanced cadence and speed sensor that wirelessly transmits collected data to compatible bicycle computers or smartphone apps thanks to Bluetooth and ANT+ technology. The BK805 is the ideal tool for monitoring performance while cycling.

Universal fit

The BK805 is compatible with most bikes and frames. It comes with rubber bands and zip fasteners for easy installation on different types of bikes.

Accurate speed and cadence data

With Bluetooth and ANT+ technology, you can connect the BK805 to GPS bike computers and smartphones to display real-time speed and cadence data. This is ideal for cyclists who want to accurately monitor their performance.

Compatibility with third-party apps

The BK805 works with most popular cycling apps, such as Trainerroad, RidewithGPS, Zwift, Rouvy, Peloton, Openrider, CoospoRide and many others. This allows you to use your favorite training tools without restrictions.

Cadence and speed tracking

The BK805 uses an advanced Coospo-developed algorithm to track and record accurate cadence and speed data in real time. With a powerful sensor, wireless transmitter and other features, the BK805 delivers high accuracy, efficiency and performance.

LED indicator

After each battery replacement, the BK805 enters an error-reducing state for 15 minutes. During this time, the LED indicator flashes blue when the speed sensor is properly installed and the wheel is rotated. When the cadence sensor is properly mounted and the crank is rotated, the LED indicator flashes green. This gives you confidence that the installation was successful.

Training with the CoospoRide app

Once connected to the CoospoRide app, real-time cadence and speed data will be displayed directly on your phone as you ride. This is ideal for cyclists who want full control over their workouts.

Included

Main unit x 1 (CR2032 battery installed)

Crank magnet x 1

Spoke magnet x 1

Rubber band for the main device x 1

Rubber pad for main unit x 1

Battery cover tool x 1

Cable ties x 6

Screw wrench x 1

User manual x 1
