Adapter ANT+ USB Coospo RC401

Ref: 5906168434297

ANT receiver Coospo RC401

Coospo RC401 USB adapter
The adapter allows automatic transfer of training data from Garmin fitness equipment and indoor cycling workouts to Mac and Windows software. It supports various data such as cadence, speed, bike power, heart rate and fitness equipment control. It is compatible with most bicycle trainers such as BKOOL, WAHOO, TACX, ELITE, THINKRIDER, MAGENE, Garmin, Kinetic, Giant, Cycleops, Saris, and many others, and works with popular cycling software such as Zwift, Rouvy, BKOOL Cycling Simulator, PerfPRO Studio, Spivi, TrainerRoad, Sufferfest, Tacx Vortex.

Ease of use and wide compatibility
The Coospo RC401 is easy to use - simply connect it to your computer to automatically receive data from compatible fitness devices within range. Compatible with PC/Laptop and Win/Mac systems, it supports 8 transmission channels. It is also compatible with Garmin devices such as Edge 1030, 130, 25, 520, 530, 820, 830, Forerunner 310XT, 405, 410, 50, 610, 910XT, Vivofit, allowing you to sync with Garmin Connect or Training Center.
