

Robot Piesek Power Puppy Jr Lexibook

Robot Piesek Power Puppy Jr Lexibook

Ref: 3380743100715

Lexibook's Power Puppy Jr robot dog.

Lexibook presents another educational toy - the Power Puppy Jr robot is designed for children over 4 years old. With its help the youngest can not only have fun, but also develop programming and coordination skills. This friendly robot-dog will become both a friend and a teacher for any aspiring programmer.

Smart features

Power Puppy Jr. offers a number of features that support children's motor and cognitive development. The ability to program movements and dance sequences stimulates imagination and teaches logical thinking. The robot allows education through play, and encourages experimentation and discovery of new possibilities.

Safety during play

The robot is equipped with a system that stops when obstacles are detected, making it safer to use. Power Puppy Jr. is also durable and resistant to the usual accidents of child play, so parents can enjoy peace of mind.

Light and sound effects

The adorable dog offers the added attraction of light effects, which add to the fun and help create a unique atmosphere. The visual

aspects not only attract attention, but also stimulate the child's senses and creativity. An added bonus is the ability to play melodies.

Interactive fun

The Lexibook toy is equipped with sensors that make it responsive to touch - for example, when the child touches the doggie's head, it can make appropriate sounds or move in a certain way, which further increases the level of fun.

Ease of control

The set comes with a remote control, which allows even younger children to manage the robot on their own. With its help, toddlers can teach the dog various commands, practicing patience and problem-solving ability, which is important in the educational process. The robot may require several attempts before it learns new commands, which is great training for determination and repetition to achieve the goal. Note: 2 1.5V AAA batteries are required to power the remote control, which must be purchased separately.

Up to 40 minutes of non-stop entertainment

With a powerful 400 mAh battery, your child can train his Power Puppy Jr robot for up to 40 minutes. This is long enough to teach the doggie new sequences of movements and have a nice time with it. Charging the toy takes about 1.5 hours.

Included:

Robot Power Puppy Jr Lexibook Remote control USB cable for charging User manual
