Ref: 6938994402415

### Eagle-30A

Eagle-30A speed regulator dedicated to current (DC) powered aircraft models. It features a constant current of 30A and a maximum peak current of up to 40A, providing a stable and efficient power supply. Compatible with NiXX (4-10 cells) and LiXX (2-3 cells) batteries, it offers a wide range of applications for various models. Equipped with a built-in BEC with 5V and 1A current, it allows powering on-board electronics without the need for additional power sources. Compact dimensions (45 mm long, 21 mm wide, 8 mm high) and low weight (21 g) facilitate installation in models with limited space. The Eagle-30A supports unidirectional control, has a brake function, and is programmable, allowing customization of operating parameters. The lack of sensor inputs further simplifies the design and operation.
