

## Motor Hobbywing EZRUN 2030 12T - 7800Kv

Motor Hobbywing EZRUN 2030 12T - 7800Kv

Ref: 6938994406086

EZRUN 2030 12T - 7800Kv

The EZRUN 2030 12T - 7800Kv brushless motor from manufacturer Hobbywing is a powerful drive unit designed for high performance in RC models. With a RPM per volt ratio of 7800 RPM/V, it provides excellent acceleration and high speed, making it an ideal choice for high-speed models. Its compact dimensions (20 mm in diameter, 30 mm in length) and 2 mm diameter shaft make it easy to install in various models. The motor weighs just 46 g, which minimizes strain and improves energy efficiency. The EZRUN 2030 is compatible with Li-Po batteries, allowing the use of advanced power technologies.

Manufacturer Hobbywing Model HW90010000 Diameter 20 mm Length 30 mm Weight 46 g Shaft diameter 2 mm RPM per volt 7800 RPM/V Compatibility with batteries Li-Po
