CR-PLA Wood Filament Creality (White Pine)

Ref: 6971636408666

CR-PLA Wood Filament Creality (White Pine)

Creality CR-PLA Wood (White Pine) Filament.
Creality's CR-Wood PLA filament is ideal for creating figurines and more. It stands out for its beautiful wood color, high strength and resistance to distortion. It allows smooth and fast printing - without clogging the nozzle. What's more, it's made of durable and environmentally friendly materials. At the same time, it is compatible with most FDM printers on the market.

Top quality manufacturing
Environmentally friendly, biodegradable materials were used to make the filament, which is characterized by very high durability. Its undoubted advantage is also its elegant wood color - you will successfully use it, for example, for printing decorations.

Smooth printing
The filament allows you to print 3D models smoothly and quickly - at speeds of up to 90 mm/s. It is distinguished by excellent adhesion and low shrinkage. It is also resistant to distortion and minimizes the risk of clogging the printer nozzle. All this will allow you to print your chosen parts with ease and save time!
