Tattu 650mAh 14.8V 75C 4S1P XT30 battery

Specifically for UAV use, the Tattu brand has designed new batteries with unrivalled quality. They offer exceptional power whether you're using smaller drones for recreational use or heavy rigs for computing applications. Batteries often look similar from the outside - their real strength, however, lies inside. The cells in Tattu batteries are designed specifically for UAV requirements. Do not discharge below 3.0V per cell. Charge only with a microprocessor-based charger in lithium polymer pack charging mode. Do not short-circuit poles, do not puncture, do not expose to direct sunlight, store away from flammable objects, dispose of in specially prepared containers.
