

## SSD Enclosure, INVZI, EN01, NVMe & SATA, 10Gbps

Ref: 0754418395592

SSD Enclosure, INVZI, EN01, NVMe & SATA, 10Gbps

SSD Drive Enclosure, INVZI, EN01, NVMe & SATA, 10Gbps

The INVZI EN01 SSD enclosure is the ideal solution for those who need to expand their memory, upgrade their system or store important files. With compatibility with both M.2 NVMe and SATA drives, you have complete freedom to choose the right storage medium.

Unmatched data transfer speeds

With transfer speeds of up to 10Gbps, the INVZI EN01 enables lightning-fast data transfer, which significantly speeds up your work with large files. Whether you're backing up, recovering data, or transferring high-quality photos or videos, everything goes faster and more efficiently with this enclosure.

Exceptional convenience and security

The case is made of high-quality aluminum, which ensures durability and efficient heat dissipation. What's more, the enclosure requires no tools, allowing you to quickly and easily install or replace SSDs. This allows you to focus on your work instead of wasting time on complicated installations.

Wide compatibility

The INVZI EN01 SSD enclosure is compatible with the MagHub 1 and MagHub 2, adding to its versatility. You can easily integrate it with

existing docking stations, making it an ideal choice for those who value flexibility and ease of use.
