Flange Insert 19 mm for M5 Momcozy

The M5 Momcozy 19mm Reducer is an indispensable item that allows you to adjust the breast pump to your needs. It is compatible with the M5 breast pump from Momcozy. To ensure optimal performance and hygiene, it is recommended to regularly replace the reducer every 1-3 months, especially if you notice a decrease in the pump's suction power. This will ensure that you are feeding your baby in the safest and most effective way.
