

Tattu Balance board for 6S-12S batteries

Tattu Balance board for 6S-12S batteries

Ref: 6928493310595

Tattu Balance board for 6S-12S batteries

The Tattu Balance Board is designed to optimize the charging process for batteries with 6S to 12S configurations. With a 250mm long cable, the board offers connection flexibility and compatibility with the TA3200 charger, allowing for efficient and safe charging of larger sized batteries. The Tattu balancing plate is an indispensable accessory for users who need to reliably and precisely balance the voltages of individual cells during charging, ensuring longer battery life and better performance.
