Digital lock cylinder Avatto SDL-S1-B70 70 mm black
Ref: 6976037361435

Digital lock cylinder Avatto SDL-S1-B70 70 mm black

Avatto SDL-S1-B70 digital lock cylinder (70 mm, black).

Ensure the security of both yourself and your loved ones. The Avatto SDL-S1-B70 digital lock cylinder allows for a variety of ways to unlock the door, including using a fingerprint, IC card, the Tuya mobile app or with a traditional key. Installation of the cylinder is smooth and hassle-free, and the ability to remotely manage access to the home provides convenience and peace of mind on a daily basis.

Various methods of unlocking the door

The SDL-S1-B70 cylinder offers four different ways to unlock the door. A fingerprint allows for quick and secure user recognition, while an IC card is easy to use, making it suitable for children and seniors. The Tuya app allows remote access control, while a traditional key is an emergency option.

Ease of installation

Installing the Avatto SDL-S1-B70 cylinder using a hex screwdriver takes just 10 minutes and does not require changing the door and doorframe structure. Thanks to its adjustable length, the cylinder can fit 99% of the doors available on the market, making it an ideal replacement for traditional lock cylinders.

The Tuya app allows you to remotely manage access to your home from anywhere in the world. Features such as Family Management, access control and viewing unlock history give you full control over the security of your property. From the app, users can be added and removed, as well as monitor who has unlocked the door and when.

Efficiency and energy savings
The Avatto SDL-S1-B70 features a fast fingerprint recognition time of just 0.3 seconds. The device consumes little power, so it provides a long service life. You will power it using a CR123A alkaline battery. In case of low battery, the system will automatically send a notification.

High quality workmanship
The insert is made of high-quality materials that ensure durability and resistance to damage. Thanks to advanced technologies, such as a fingerprint reader with 360-degree recognition, the device provides a high level of security. In addition, it is waterproof, which further enhances its durability and reliability.
