Smart doorbell Avatto SVD02
Ref: 6976037361565
Smart doorbell Avatto SVD02

Avatto SVD02 smart doorbell
The Avatto SVD02 smart doorbell is equipped with a 1080P FHD wide-angle camera, which provides full protection around the clock thanks to its 170° viewing angle. With night vision and motion detection, the device guarantees security regardless of the time of day. In addition, the Family Share function makes joint home management even easier. A PIR Sensor Night Light USB Powered Door Chime is also included.

High image quality and two-way audio
A 1080P FHD camera with a wide viewing angle (170°) allows you to closely monitor the environment around your door. So you can be sure that nothing will escape your attention - the preview is clear both during the day and at night. The two-way audio system allows direct communication with visitors.

Night vision and motion sensors
With four sensitive infrared LEDs and a motion sensor, the doorbell automatically switches between day and night modes. You'll also receive notifications when motion is detected, so you can quickly respond to any disturbing events if necessary. Automatic mode switching and high sensor sensitivity guarantee reliability in any situation.

Remote control

With the Smart Life and Tuya Smart apps, you can receive notifications, make video calls and monitor your home from anywhere in the world. The app also allows you to view stored video recordings and remotely manage your doorbell. Cloud storage of recordings is also available for additional data security.

Voice messages

The Avatto SVD02 works with Amazon Echo Show and Google Home Hub, allowing you to control the device with voice commands. You can easily control the ringtone and make video calls to your guests with simple voice commands for added convenience.

Dual power system

The Avatto SVD02 bell offers a dual power system - you can connect it to the mains (DC/AC 12-24V) or charge the built-in lithium battery. This allows the device to operate continuously even during power failures. Low power consumption allows for about 3 months of standby operation.

PIR Sensor Night Light USB Powered Door Chime included

The kit also includes a PIR Sensor Night Light USB Powered Door Chime, which provides additional safety and convenience. An LED flashing light lets you know when the doorbell is ringing, and you can choose from 58 melodies to customize the device's operation. The sensor offers a range of up to 150 meters in open space. It is also possible to adjust the volume from 25 to 85 dB. The light and the doorbell connect via RF433 technology, which ensures reliable communication between the devices.
