

Outdoor Wi-Fi Camera IMOU Bullet 3 3MP

Ref: 6971927238040

Outdoor Wi-Fi Camera IMOU Bullet 3 3MP

IMOU Bullet 3 3MP Wi-Fi outdoor camera

The IMOU Bullet 3 camera provides 3MP monitoring and features a 2.8mm lens. It also supports 4 night vision modes, ensuring clear images even in the dark. Its IP67-level ruggedness allows it to be used outdoors, regardless of weather conditions, while its spotlight and siren with a volume of 110 dB effectively deter intruders. Thanks to the IMOU SENSE algorithm, the device accurately detects people and vehicles, increasing security on the property.

High-quality image

Bullet 3 captures images in 3MP (2304*1296) resolution, providing quality higher than Full HD. H.265 compression reduces the size of video files without sacrificing quality, allowing you to store recordings for longer. This allows you to enjoy clear images and save storage space. There is also an 8x zoom capability.

Color night mode

The IMOU offers 4 night vision modes, allowing you to get daytime-quality images even in total darkness. A built-in reflector further improves visibility, which is especially useful in poorly lit areas.

People and vehicle detection

Advanced algorithms allow fast and precise recognition of people and vehicles. The function used significantly reduces the number of false alarms, increasing the effectiveness of monitoring. As a result, you will receive notifications only when an intruder is detected.

Two-way communication

The IMOU Bullet 3 camera allows you to communicate with people nearby. The built-in microphone and speaker allow for real-time conversations, which is ideal for managing access to the property or deterring intruders.

Wi-Fi connectivity and dedicated app

The camera is equipped with an IEEE802.11b/g/n/ax (2.4 GHz) compliant Wi-Fi module for a stable wireless connection. The Imou app, compatible with iOS and Android, allows easy management of the device from anywhere and provides access to relevant information.

Storage of recordings

The IMOU Bullet 3 supports a variety of recording storage methods, including NVR, cloud and Micro SD cards of up to 256GB. You can choose the most convenient option for you and enjoy constant access to your video footage.

Weatherproof

Mount the camera outdoors without worry. The IMOU Bullet 3 is IP67 dust and water resistant. Its performance won't be affected by harsh conditions either - the device is rated to operate in temperatures ranging from -30°C to 50°C. The rugged design ensures long-term durability and reliability.
