Smart Scene Wall Switch WiFi Sonoff M5 3C (3-channel)   Ref: 6920075777116

Smart Scene Wall Switch WiFi Sonoff M5 3C (3-channel)

Sonoff M5 3C smart wall switch (3-channel)
Enjoy convenient control over the lighting in your home. The Sonoff M5 3C smart light switch will allow you to control your lights using the eWeLink app. You also have the ability to create work schedules and smart scenes. At the same time, the switch is very easy to install, and it is made of durable, fire-resistant PC plastic.

Try the eWeLink app
With the eWeLink app, you can easily control the lighting in your home from anywhere. Not sure if you turned off the lights before leaving for work? Now you can do it with your smartphone!

Convenient operation
The M5 3C will also work well as a simple light switch. It is equipped with three physical buttons, which are distinguished by high responsiveness and reliable operation. Its additional advantage is LED backlighting, the brightness of which you can adjust via the app - so you can easily locate it after dark.

Safe use
The switch is made of durable yet fire-resistant PC V0 plastic. This makes it resistant to damage and high temperatures - it will perform

well in almost any situation. Its installation, configuration and eventual disassembly will also not cause you any problems and will not take too much time.

Voice control
Do you have busy hands or do not want to move from your comfortable place, and need to turn the light on or off? No problem - the Switch is compatible with voice assistants such as Siri, Alexa and Google Assistant, for example. This way, with just a few words, you can customize the lighting to your needs!

Even more possibilities
The M5 3C switch also allows you to create smart scenes. For example, you can combine it with separately available sensors to make the light turn on automatically when you get out of bed or enter a room. Work schedules are also an interesting option. Set the lights to spontaneously turn on in the morning when the alarm clock rings, and then turn off when you go to work! You can also pair the product with the NSPanel (not included) or take advantage of the ability to control one light with two switches (using the Sonoff R5, available separately).
