Wireless mechanical keyboard Dareu EK868 Bluetooth (white&blue)

Dareu EK868 BT low-profile mechanical keyboard

The EK868 keyboard is capable of meeting the expectations of even the most demanding gamers. It features a long-lasting battery, which can be recharged using the included USB cable, and 68 keys with a lifespan of up to 50 million clicks, and their height has been halved (to 5.52 mm). Thanks to the use of high-quality materials, the device is extremely durable, yet comfortable to use. The keyboard focuses on the most necessary functions and keys, so it is devoid of a numeric keypad, reducing the required space by 40%.

Reliable mechanical switches

The keyboard is designed to provide you with comfort and freedom of use. Its mechanical switches are distinguished by a low travel of just 3 mm and guarantee smooth, reliable response. What's more, at its thinnest point, the thickness of the keyboard is just 15 mm, which means a more natural wrist position.

2 connection modes: wired or Bluetooth

You can connect the keyboard to your computer in 2 ways. The Bluetooth wireless connection allows you to pair it with as many as 3 devices at once, and a built-in button allows you to switch between them. You will find a similar solution useful at work, for example. You can also connect the EK868 with a USB-C cable.

Capacious lithium battery

The keyboard has a built-in 2000 mAh lithium battery. If you turn off the backlight, it can run for up to 30 days on a single charge. When the backlight is on, the device's operating time is up to 6 days. It takes about 6 hours to charge the battery. The keyboard can also be used while charging.

Additional amenities

The keyboard is equipped with a physical switch that is used to switch devices and systems. Magnetic stands allow it to be raised 3.5 mm, and a special aluminum alloy panel provides the product with greater strength and corrosion resistance. EK868 is also distinguished by its small size - it won't take up too much space on your desk.
