Naturehike FC-10 inflatable mattress NH19Z032 blue

Naturehike FC-10 inflatable mattress is an excellent choice for people who value comfort and functionality during camping and outdoor expeditions. With a thickness of 6.5 cm and a unique design with square air chambers, the mattress effectively insulates you from the cold ground, keeping you warm and comfortable.

Functionality and comfort

Naturehike D01 can be combined with other mats using snaps to create a larger sleeping area. When folded, the mat takes up little space (24 x 67 cm) and weighs only 3.6 kg, making it an ideal choice for couples or families who value comfort and convenience during outdoor adventures.

Durability and thoughtful design

The mattress is made of durable material with a waterproof TPU coating for long-lasting protection against moisture and wear. The two-layer nozzle in the mattress is designed for maximum comfort. The first layer with a smaller opening allows the mattress to be easily inflated, while the second layer with a larger opening allows the air to be quickly deflated, making the process of folding and storing the mattress much quicker.
