

## Filter ND100K PolarPro Quartz Line for 77mm lenses

Ref: 817465021439

Filter ND100K PolarPro Quartz Line for 77mm lenses

PolarPro Quartz Line ND100K filter for 77mm lenses

The ND100K filter allows you to shoot in extremely bright conditions, giving your shots a unique character. It provides incredible light reduction, allowing you to create long exposure effects even in the most demanding lighting conditions. Features exceptional scratch resistance, as well as water and oil resistance.

Indispensable in extreme lighting conditions

The ND100K filter is a key piece of equipment for any photographer who wants to get perfect shots in the most demanding lighting conditions. Thanks to its ability to reduce light by up to 16-degrees, you can control exposure and create extremely dynamic images while maintaining full clarity and detail. Whether you want to freeze motion in dynamic scenes or achieve soft, smooth effects in long exposures, the ND100K filter will allow you to achieve amazing results!
