

GravaStar Mercury M1 Pro Wireless Gaming Mouse Battle-Worn V

Ref: 6972448922265

GravaStar Mercury M1 Pro Wireless Gaming Mouse Battle-Worn Version + 4K Dongle

GravaStar Mercury M1 Pro Wireless Gaming Mouse (gray) + 4K receiver

Get even more enjoyment out of your gaming experience. The GravaStar Mercury M1 Pro wireless gaming mouse is designed for the most demanding gamers. Its innovative design and advanced features make it easy to achieve the victory of your dreams. The PAW 3395 sensor with a resolution of up to 26,000 DPI provides incredible precision and responsiveness with a maximum acceleration of 650 IPS. You can also choose from 3 ways to connect - 2.4 GHz, Bluetooth 5.1 and USB-C. The device's design was awarded at the Red Dot Design Award 2024, and it comes with a 4K receiver, among other features.

PAW 3395 sensor - precision and speed

Thanks to the high-end PAW 3395 sensor, the GravaStar Mercury M1 Pro mouse offers a resolution of up to 26,000 DPI, allowing you to perfectly adjust the sensitivity to any game and gaming style. The maximum acceleration is 650 IPS, which, combined with a refresh rate of up to 4KHz, guarantees that every movement is captured with the highest accuracy.

Lightweight but durable

The skeleton of the device is made of lightweight and durable magnesium alloy, which provides the perfect balance between durability and responsiveness. Thanks to the openwork design, your hand will stay cool even during the longest gaming sessions. In addition, Teflon glides guarantee smooth movements on any surface.

Universal design

GravaStar Mercury M1 Pro is distinguished by its symmetrical shape, which perfectly fits any hand, regardless of the preferred grip style - palm, tip or claw. As a result, the mouse provides maximum comfort for both left- and right-handed gamers, allowing you to fully focus on the game.

Three connection options

The GravaStar Mercury M1 Pro mouse offers three connectivity options: 2.4 GHz, Bluetooth 5.1 and USB-C. So you can enjoy complete freedom of choice, no matter how you like to play.

Play even longer

One charge of the GravaStar Mercury M1 Pro mouse, which took about an hour and a half, allows for 146 hours of gaming using a 2.4 GHz connection or as much as 200 hours using Bluetooth 5.1. The USB-C charging capability ensures that the mouse is always ready for action even during intense gaming sessions.

Customizable

The mouse features 5 programmable buttons that can be customized with GravaStar software by creating custom macros and profiles. In addition, removable caps provide a secure grip. Thanks to GLOWSYNC technology, the device offers 5 RGB backlighting modes. Choose from 16.7 million colors and make your gaming stand reflect your personality!
