GravaStar Alpha65 65W GaN Fast Charger War Damaged Version Blue

GaN GravaStar Alpha65 65W charger (blue)

The GaN GravaStar Alpha65 65W charger combines futuristic design and advanced technology. Its unique design, inspired by cyberpunk aesthetics and mechanical robotics elements, sets it apart from other chargers on the market. It uses GaN technology and its charging power reaches 65 watts. With three available ports, it provides the versatility you need to charge several devices simultaneously.

Charge with 65 watts of power

Forget about waiting long hours for a full charge! The charger offers 65 watts of power, so your phone or laptop can be up and running in no time. With support for Power Delivery and Quick Charge fast charging standards, the GravaStar Alpha65 not only provides instant charging, but also maximum performance.

Up to 3 devices simultaneously

The GravaStar Alpha65 is equipped with three charging ports, including two USB-C ports and one USB-A port. This allows you to charge three devices simultaneously! Whether it's a laptop, smartphone, tablet or other accessories, the Alpha65 offers the flexibility to meet all your charging needs.

Power and performance

The GravaStar charger uses advanced GaN (gallium nitride) technology, combining powerful power with a compact design. As a result, it provides higher efficiency and less energy loss compared to traditional chargers. In addition, it does not overheat even during heavy charging, making it not only efficient to use, but also safe for your devices.

For the sake of safety

Alpha65 takes care of the safety of your devices. It is equipped with 8 levels of protection to ensure comprehensive protection against potential damage. They protect against overvoltage, overcurrent, short circuit, overheating, excessive power, interference or electrostatic discharge, among others.
