Frame case TELESIN for DJI Osmo Pocket 3

Ref: 6974944462221

TELESIN frame case for DJI Osmo Pocket 3 camera

Get more recording options with the TELESIN frame case. This practical accessory designed for the DJI Osmo Pocket 3 camera is made of aluminum alloy and offers various mounting interfaces for quick installation of additional accessories. It's also very durable and provides comfortable use in any situation.

Durable aluminum construction

The TELESIN case was created from high-quality aluminum alloy, making it extremely durable and resistant to mechanical damage. In addition, its interior is lined with soft silicone, which not only protects the camera from scratches, but also ensures its stability and security.

Two types of mounting interfaces

The TELESIN case is equipped with two types of interfaces: 1/4-inch and two-pin interface. This allows you to easily mount the camera on various accessories, such as, for example, tripods, backpack mounts, selfie sticks and more. This gives you full freedom to customize your recording setup for different scenarios.

Comfortable use without restrictions

The case is designed so as not to affect the comfort of the DJI Osmo Pocket 3 camera. It does not obstruct the charging port and allows you to use different types of mounts without any problems - both the 1/4 thread mount and the battery grip.

Included

Metal head with quick-release coupling 1/4 adapter Threaded rod
