Teclast M50 10.1" 6/128 GB WIFI Tablet (blue)

The Teclast M50 is a versatile tablet with a 10.1-inch INCELL IPS screen with a resolution of 1280x800, which offers brightness from 10cd/m² to 300cd/m² and supports multi-touch on 10 points. The device runs on Android 13 and guarantees smooth performance thanks to an 8-core processor and 6GB RAM, and offers 128GB of internal storage expandable up to 1TB via Micro SD card. A parental control function is also available.

Multimedia and audio

The tablet provides high quality audio thanks to four stereo speakers with the Momentum III system and Smart K amplifier, offering deep bass and clear tones. In addition, the 3.5mm port allows you to use your favorite headphones, further enhancing the user experience. The tablet also supports Widevine L1 technology, providing access to HD and UHD content from streaming services such as Amazon Prime Video and Disney+.

High-end cameras

With a dual 13MP rear camera with AI and algorithmic optimization, and a 5MP front camera with facial recognition, the Teclast M50 tablet allows you to take clear photos and make video calls even in low light.

Fast and stable connectivity

The M50 supports TDD and FDD LTE for VoLTE, allowing simultaneous voice calls and Internet browsing. The tablet also offers dual-band Wi-Fi (2.4GHz + 5GHz) and Bluetooth 5.0 for fast and stable connections.

Reliable navigation

An advanced GPS module with additional support for BEIDOU, GLONASS and GALILEO provides accurate and fast localization, which is extremely useful when traveling.

Energy efficiency

The tablet is powered by energy-efficient components, including a processor with A75 and A55 cores that ensure optimal management of power consumption while maintaining high operational performance.

Long working time

With a 6,000 mAh battery, the Teclast M50 provides up to 12 hours of music playback, 8 hours of Internet browsing or movie watching, making it an ideal companion for active and frequent travelers.

Security and personalization

Android 13 offers advanced personalization and security options, allowing users to customize privacy settings, manage app permissions and control personal data.

Thoughtful design

A lightweight (450g) and slim design (8mm thick) in an attractive color makes the tablet easy to carry and elegant. There are 4 modes, allowing you to take care of your eye health. In addition, the use of TDDI technology has improved touch sensitivity and increased the response speed to 120 Hz. InCell Fully Laminated increases light transmission, which improves the quality of the displayed image.
