

IP Outdoor Camera ZOSI C289 WiFi Pan Tilt 3MP IP66 with 32GB

Ref: 6941709226152

IP Outdoor Camera ZOSI C289 WiFi Pan Tilt 3MP IP66 with 32GB microSD card

ZOSI C289 WiFi 3MP Pan Tilt IP66 outdoor camera + 32GB microSD card

The ZOSI C289 outdoor camera is an advanced monitoring device that ensures the security of your property with modern technologies and robust design. Equipped with a 1/2.7" progressive scan CMOS sensor and a 4.0mm lens at F1.6, it offers clear images with a resolution of 1920x1080 pixels. In addition, it provides high quality images up to 30 meters also at night thanks to the infrared light used. H.265 video compression ensures smooth and cost-effective data transfer, while intelligent AI algorithms detect faces, vehicles, animals and other objects.

Clear images in a variety of conditions

The ZOSI C289 camera uses an advanced lens with adaptive shutter to provide clear and detailed images around the clock. With a CMOS sensor and an adaptive ICR infrared filter, the camera captures high-quality video both day and night. In addition, infrared with a range of up to 30 meters ensures excellent visibility even in total darkness.

Smart features and alarms

The ZOSI C289 is equipped with intelligent AI algorithms that can detect faces, vehicles, pets and other objects, enhancing the effectiveness of monitoring. The camera supports intelligent motion detection and human detection, allowing it to respond quickly to suspicious events. If necessary, the camera can send push notifications directly to your smartphone.

Easy to install and convenient to use

The camera is waterproof and dustproof (IP66), making it ideal for a variety of weather conditions. It supports a wide range of network protocols, such as IPV4 DHCP, ONVIF, TCP/IP, NTP RTSP, P2P, making it easy to integrate into existing monitoring systems. The 23 dB antennas and 2.4 GHz frequency ensure a stable network connection. The camera also supports TF memory cards of up to 128GB for long-term storage of recordings. Note: the kit includes a 32 GB microSD card.

High-quality sound and additional features

The ZOSI C289 has a built-in speaker and microphone for two-way communication. Features such as 3D digital noise reduction, wide dynamic range, backlight compensation and strong light suppression ensure high quality audio and video in all conditions. The camera also has image duplication capability, which is useful for monitoring larger areas.
