

IP Outdoor Camera ZOSI C298 WiFi Pan Tilt 6MP Dual IP66

Ref: 6941709230685

IP Outdoor Camera ZOSI C298 WiFi Pan Tilt 6MP Dual IP66

ZOSI C298 WiFi 6MP dual Pan Tilt IP outdoor camera IP66

The ZOSI C298 outdoor IP camera is an ideal solution for those looking for an advanced surveillance system. Thanks to dual Pan Tilt technology, the device provides full coverage of the area, eliminating blind spots - the upper, stationary head provides 2MP resolution, while the lower, rotating head provides 4MP. The solution used guarantees crystal-clear images, both during the day and at night, which significantly increases the security of your property. In addition, the external housing is IP66 waterproof and provides protection from all weather conditions.

Exceptional image quality

The ZOSI C298 camera is equipped with 2 lenses (2.8mm and 8.0mm), which provide a wide angle of view and detailed close-ups. This gives you the ability to monitor large areas and enjoy precise surveillance of important points. The resolution of 2560x1440 ensures that every detail is captured with the utmost precision. The 8x zoom allows you to conveniently zoom in on objects.

Advanced night features

Night monitoring has never been so effective. The camera is equipped with 4 infrared LEDs that guarantee visibility up to 30 meters. Meanwhile, 2 warm lights provide colorful night images. As a result, even in total darkness, the ZOSI C298 camera provides clear and colorful images, which is essential for identifying intruders.

Smart tracking and notifications

ZOSI C298 offers an automatic tracking function for people and vehicles. This way you will always know who is moving around your property. Smart push notifications and email alerts notify you of any suspicious movements, allowing you to respond immediately.

Additional features for security

The camera is equipped with an alarm siren and bright warning lights that can scare away potential intruders. Two-way audio allows communication with people within the range of the device, further enhancing security. The solution used makes it possible to scare off uninvited guests from a safe distance.

Hassle-free data storage

The C298 offers three data storage options - the ability to use a Micro SD card of up to 128GB (not included), interoperability with the ZOSI NVR for 24/7 recording, and a cloud option with a 30-day free trial. You decide how and where the recordings are stored.
