

IP Camera ZOSI 2 pcs C296 WiFi 5MP & 2 pcs C182 WiFi 8MP + N

Ref: 6941709235741

IP Camera ZOSI 2 pcs C296 WiFi 5MP & 2 pcs C182 WiFi 8MP + NVR 8ch + 2TB HDD

Set of four IP cameras ZOSI C296 WiFi 5MP (2 pcs.) and C182 WiFi 8MP (2 pcs.) + recorder + HDD 2TB

The ZOSI solution provides the highest level of security for your home or business. The set includes four cameras - two ZOSI C296 WiFi with 5MP resolution and two ZOSI C182 WiFi with 8MP resolution. You also gain a recorder and a 2TB HDD. Enjoy peace of mind knowing that your home or business is under constant protection.

High resolution and image quality

The ZOSI C296 and C182 cameras provide exceptional image quality to capture the finest details. The C296 offers 5MP resolution, ensuring clear and detailed images. With 8MP resolution, the C182 camera enables ultra-high resolution 4K monitoring, which is especially useful in large spaces where it is important to capture as much detail as possible.

Excellent visibility even at night

The ZOSI camera set provides excellent visibility both during the day and at night. The C296 camera is equipped with four warm light LEDs and six IR LEDs, which allow visibility of up to 30 meters in total darkness. The C182 uses Starlight technology, which allows it to capture clear images even in very low light, also up to 30 meters. So you can be sure that no activity will escape your attention, regardless of the time of day.

Advanced features for security

Have confidence that an unwanted person will not invade your property unnoticed. ZOSI cameras offer advanced smart monitoring features that greatly enhance security. Motion detection and facial, vehicle and human recognition allow you to be notified immediately of suspicious activity. In addition, the system can sound and light signals when an intruder is detected, effectively deterring potential burglars.

Ease of installation and operation

Installation of ZOSI cameras is simple and intuitive. The recorder supports PoE technology, so one Ethernet cable is enough for power and data transfer. In addition, the ZOSI Smart mobile app allows remote viewing of live video, playback of recordings and management of system settings from anywhere in the world. With two 5dB antennas, the cameras offer wide range and stable signal. You don't have to worry about connection problems. The IEEE802.11b/g/n standard and wide frequency range (2.4GHz ~ 2.4835GHz) guarantee compatibility with most routers on the market.

Recorder and HDD included

The recorder, which is part of the kit, provides reliable storage and management of recordings. With an HDD capacity of 2TB, all important moments will be recorded and stored safely. The recorder supports up to 8 IP channels, allowing for flexible expansion of the surveillance system in the future. In addition, various recording modes, such as manual recording, scheduling and smart recording, allow you to customize the system to meet your individual needs.

Practical additional features

ZOSI cameras also offer a number of advanced additional features to enhance the user experience. 3D noise reduction, dynamic range (WDR) and background compensation ensure excellent image quality in all lighting conditions. The units are also weatherproof, so they can be safely used outdoors. In addition, a remote reset and shutdown function ensures easy system management even in the event of technical problems.
