Wi-Fi Smart Switch Meross MSS710HK (HomeKit)

Meross MSS710HK Smart Wi-Fi Switch (HomeKit)
Managing your smart home has never been easier. The Meross Wi-Fi switch allows you to easily control your paired devices remotely - using apps or voice commands. The device is compatible with Apple HomeKit and Google Assistant, among others. You only need an existing Wi-Fi network for it to work properly - you don't need any additional hubs.

Control your devices remotely
Gain remote control of devices such as lamps, fans or heaters. Among other things, the Meross app allows you to conveniently turn on and off the equipment paired with the switch remotely, as well as check its status. The product is also compatible with Apple HomeKit, Samsung SmartThings, Amazon Alexa and Google Assistant. You can also control it by voice, such as with the Siri smart assistant.

Create schedules and timers
Adjust the operation of your devices to your schedule. With the app, you can create schedules for the appliances connected to the switch. Make the lights automatically turn on at 7:00 AM when you get up and turn off at 11:00 PM when you go to bed. There's also a timer setting option - use it if you want the selected appliance to turn itself off after a set time. A sunrise/sunset function is also available.

Mounting and configuring the switch will not cause you any problem. You don't need to buy additional hubs either - all you need is a working Wi-Fi network. The device also ensures the safety of use. It is equipped with an overload protection circuit, and its housing is made of durable, fire-resistant plastic. All this means that the switch can serve you well for a long time.
