High Density Foam Windshield Puluz For Insta360 Ace Pro High Density Foam Windshield Puluz For Insta360 Ace Pro

Puluz Foam Shield for Insta360 Ace Pro

The Puluz Foam Shield is the ideal solution for anyone recording in high wind conditions or during dynamic activities. Thanks to its special design, the shield effectively reduces wind noise, ensuring clear and crisp sound on your recordings. It not only improves sound quality, but also protects the Insta360 Ace Pro camera from scratches, fingerprints and dirt. With precise cutouts, it allows easy access to all function ports, buttons, battery door, memory card and lens.

Durable

The cover is thin but extremely durable, providing reliable protection. Made of high-density, eco-friendly sponge, it is highly flexible and resistant to deformation. This is a guarantee that even after prolonged use the cover will retain its protective properties. It is also easy to clean - it can be washed, allowing it to be used repeatedly without losing quality. It perfectly adapts to the shape of the camera, without adding unnecessary bulk.
