Book light Glocusent bookmark USB wireless 500mAh (White)

Glocusent Bookmark USB wireless 500mAh bookmark light (white)

Enjoy a quiet evening reading without distractions with the Glocusent Bookmark USB bookmark light. This sleek white gadget will not only illuminate the pages of your favorite book, but also add style and functionality to your nighttime routine.

The perfect illumination for any occasion

Choose from five levels of brightness that you can customize, providing you with the perfect lighting for reading in bed. With five carefully positioned LEDs, the light evenly illuminates the pages of your book without disturbing the sleep of those around you. With no flickering or harsh light, your eyes will be protected even during long reading sessions.

Three color modes for your convenience

The lamp offers three color modes: amber mode (1800K), breeze mode (3400K) and precision mode (6000K). The amber mode filters 99.9% of blue light, protecting your eyes and reducing fatigue. The breeze mode provides cozy and comfortable illumination ideal for reading novels or poetry, while the precision mode perfectly highlights details, allowing you to fully focus on the text.

Long runtime and easy charging

The built-in 500mAh battery provides between 10 and 80 hours of reading on a single charge, depending on brightness settings.

Charging via a standard USB port is fast and convenient - a full charge takes just 1.2 hours. With four battery level indicators, you always know how much power is left.

Flexible and portable design

With a clip that can be opened up to 150° and the lamp head that can be rotated left, right and down at 90°, 90° and 45°, respectively, the Glocusent lamp fits perfectly into a variety of book sizes. It is extremely lightweight, weighing just 40g - less than an egg. The compact design makes the lamp ideal for travel and easy to carry.
