### Redtiger F17 video recorder

The Redtiger F17 video recorder provides comprehensive vehicle protection and monitoring. It features built-in GPS and has 64GB of memory. The device supports 5G Wi-Fi and provides 24-hour parking monitoring, making it an ideal solution for any driver who values security and wants to gain 24/7 control over their car. The device captures every angle thanks to its three channels - the front camera records in 4K UHD, while the inner and rear cameras record in 1080P quality, providing a complete picture of the situation around and inside the vehicle.

### GPS and 4K recording

The Redtiger F17 offers a built-in GPS module that allows you to accurately track your vehicle's route. You can simultaneously record video from three channels - front, interior and rear. The front camera records in 4K UHD quality, providing high image quality and detail that can be crucial in case of collisions or other incidents on the road.

### Around-the-clock monitoring

With the Redtiger F17, your car is monitored 24 hours a day. The parking monitoring function provides complete protection, even when the vehicle is parked. By connecting a special hardwire kit, the device is able to automatically start recording when motion or impact is detected.

#### Fast and reliable WiFi connection

Thanks to its built-in 5G WiFi module, the Redtiger F17 video recorder provides a fast and stable connection that allows you to instantly transfer recordings to your mobile devices. OTA (Over the Air) technology allows for easy and wireless software updates, so you'll always benefit from the latest features.

#### Powerful capacitor

The Redtiger F17 video recorder is equipped with a capacitor that is resistant to extreme temperatures and ensures long-lasting and reliable operation of the device. As a result, the device works flawlessly in temperatures from -20 to 70°C.

#### Night recording

The F17 offers enhanced night recording features thanks to the Sony Starvis sensor and HDR and WDR technology. The front camera captures high-resolution images, while four IR LEDs inside the vehicle ensure clear recordings even in total darkness.
