

Wireless lamp Glocusent clip-on book light, USB-C (White)

Ref: 5906168435072

Wireless lamp Glocusent clip-on book light, USB-C (White)

Comfortable eye protection

The Glocusent lamp with clip is an innovative device, it will allow you to comfortably read books in the evenings, even in dimly lit rooms. With a unique design inspired by the willow leaf, the 10 LEDs are arranged to provide even illumination. Three brightness levels allow you to customize the light, from a bright beam to a soft glow that won't disturb the sleep of others nearby.

Fast and secure USB-C charging

The Glocusent lamp offers three color modes that are perfect for evening reading. Amber mode (1800K) filters 99% of blue light, promoting melatonin production and helping you fall asleep. Breeze mode (3400K) reduces glare and provides cozy illumination ideal for long reading sessions without eye fatigue. And precision mode (6000K) provides bright, clear light, ideal for focusing on details.

Lightweight and compact design

Equipped with a USB-C port, the Glocusent light is not only easy to plug in, but also safe and fast to charge. The built-in rechargeable battery provides up to 80 hours of use at the lowest brightness setting, meaning you can enjoy reading for days without the need for frequent charging. Safety certifications (MSDS) ensure that using the light is completely safe.

The lightest book light in its category, weighing only about 45 grams, it is extremely lightweight and will not weigh down your book or deform its pages. The compact design makes the lamp take up very little space, allowing you to conveniently use it anywhere and anytime, whether you are at home or on the go
