

Wireless lamp Glocusent Posh Premium book light, USB-C 1000m

Ref: 5906168435119

Wireless lamp Glocusent Posh Premium book light, USB-C 1000mAh timer (White)

Glocusent Premium Wireless Light, USB-C 1000mAh timer (white)

The Glocusent Premium Wireless Light is the perfect companion for book lovers who appreciate comfortable lighting while reading. Thanks to its advanced design with a double row of 16 LEDs, it offers maximum brightness, evenly illuminating the pages of a book without sharp edges. You can choose from five brightness levels to customize the lighting to suit your needs.

Eye protection with three color temperatures

The Glocusent Premium Lamp offers three color modes for optimal illumination in any situation. The 1800K mode eliminates 99.99% of blue light, protecting your eyes and allowing you to sleep soundly after an evening of reading. The 3400K mode creates a relaxing atmosphere ideal for reading, and the 6000K mode provides bright, natural light to help you concentrate while working or studying. Adjust the light to your needs and enjoy reading without eye fatigue.

Efficient operation and fast charging

The Glocusent Premium Lamp is equipped with a powerful 1000mAh battery that provides up to 160 hours of operation at the lowest brightness setting. Thanks to the USB-C port, charging is fast and convenient. One full charge lasts a long time, which is ideal when traveling. In addition, by reducing the use of disposable batteries, you contribute to environmental protection.

Private reading and timer function

You don't have to worry about disturbing your partner's sleep - the Glocusent Premium lamp emits a concentrated light that illuminates only your book. In addition, the timer function for 30 minutes makes the lamp automatically turn off, saving the battery. This is a useful feature for those who happen to fall asleep while reading. The lamp's compact size and light weight make it an ideal travel companion, easy to pack and use anywhere.
