Wireless gaming keyboard Darmoshark K5 Light luxury version yellow switch

Wireless gaming keyboard Darmoshark K5 Light luxury version yellow switch

The Darmoshark K5 Light luxury version gaming keyboard is a tool that will meet the expectations of even the most demanding gamers. The K5 model measures 320 × 111 × 40.5 mm and weighs about 555g, which ensures comfort of use and stability during intense gaming sessions. The keyboard offers an impressive key life of 50 million clicks. It is compatible with Windows XP/Vista/Win7/Win8/Win10 and Macintosh OS, making it a versatile choice for many users.

Wired and wireless modes

The K5 keyboard has both wired and 2.4G wireless modes. In wireless mode, the battery provides a battery life of about 60 hours with the light on and as much as 300 hours with the light off. Pairing in 2.4G mode involves inserting the receiver and pressing FN+P to start the code pairing procedure. The keypad automatically enters sleep mode after 1-2 minutes of inactivity in 2.4G mode and can be awakened by pressing any key. In wired mode, the keyboard automatically switches to wired mode when the cable is connected to the computer.

Lighting and multimedia control

The keyboard offers support for 18 lighting effects, the ability to change colors and dynamically change the lighting direction. The brightness and speed of the lighting effects can be adjusted in five levels. Various FN key combinations are available for various

functions, including factory reset, WIN key lock/unlock, lighting control and multimedia control.
