Darmoshark K7 PRO EF switch wireless gaming keyboard (white)

Darmoshark K7 PRO EF switch wireless gaming keyboard (white)

The Darmoshark K7 PRO gaming keyboard is an advanced tool created specifically for demanding gamers. Built with performance and durability in mind, it has rugged dimensions of 385 × 132 × 43 mm and weighs about 1030 g to ensure stability and comfort during intense gaming sessions. The durability of the keys is an impressive 50 million clicks, guaranteeing the reliability of the device for years of use.

Operating modes and power supply

The K7 PRO keyboard offers versatile connectivity, supporting three modes of operation: wired USB, Bluetooth and 2.4G. With this flexibility, users can easily adjust the connection method to suit their preferences and needs. It is powered by a built-in 3,000mAh (11.1WH) lithium-polymer battery, providing long battery life without constant charging.

Additional features and compatibility

The K7 PRO keyboard is distinguished not only by its solid technical performance, but also by a rich set of additional features. It has multimedia control keys and FN key combinations that allow quick access to a variety of system and application functions. Built-in NumLock, CapsLock and mode indicators allow you to immediately check the status of the keyboard without having to switch to the monitor screen. The keyboard is compatible with both Windows and macOS, facilitated by a dedicated system switch.

Power management and battery

In addition, thanks to the three-channel Bluetooth feature, users can easily switch between different devices using the FN+E/R/T keys, increasing mobility and convenience. The keyboard automatically enters a power-saving mode, turning off the backlighting of the keys after a certain amount of inactivity and going into sleep mode after 10 minutes to extend battery life. The battery provides up to 40 hours of continuous use when the keys are fully illuminated, and up to 150 hours with occasional use when the backlight is turned off.
