

Operated Pencil Sharpener Tenwin 8035-1 Battery / USB (black)

Ref: 6911410180357

Operated Pencil Sharpener Tenwin 8035-1 Battery / USB (black)

Tenwin 8035-1 electric sharpener with container for battery / USB (black)

The Tenwin 8035-1 electric pencil sharpener provides precise and fast sharpening of pencils from 6 to 8 mm in diameter. The compact and lightweight design, and the ability to be powered by 2 AA batteries (not included) or via USB, make it an ideal addition to the office, classroom or studio. Equipped with non-slip pads, adjustable stylus thickness and a transparent window to check the level of the reservoir, the Tenwin 8035-1 offers maximum comfort and functionality.

High precision and performance

The 8035-1 is equipped with a high-quality replaceable blade that guarantees precise sharpening and long product life. The sharpener comes with an already installed blade and a spare blade, which you will find in the package. A dedicated knob allows you to adjust the thickness of the stylus, so you can customize the sharpening effect, whether you use pencils for writing, drawing or sketching.

2 ways to power

The Tenwin 8035-1 offers two ways to power it: with 2 AA batteries (not included) or via USB, making it very convenient to use in different conditions. No matter where you work, the sharpener is always ready for action.

Comfort and safety

Non-slip pads provide stability during work, preventing the sharpener from sliding on the surface. In turn, the transparent window allows you to easily check the level of filling of the reservoir, so you will always empty it on time.
