

Mcdodo CA-5211 USB-C to Lightning cable, 36W, 1.2m (blue)

Ref: 6921002652117

Mcdodo CA-5211 USB-C to Lightning cable, 36W, 1.2m (blue)

USB-C to Lightning Mcdodo Cable CA-5211, 36W, 1.2m (blue).

The USB-C to Lightning Mcdodo cable allows you to quickly charge your devices with its 36W PD. What's more, the digital display allows you to keep track of the battery level, and the refined design ensures damage resistance and durability.

Fast charging and data transfer

Don't wait indefinitely for your device to be ready for further use. The cable supports the PD 36W fast charging protocol, which translates into up to 4x faster charging for iPhone 8s (or newer). You can also use it to charge iPhones from other series, iPad and AirPods headphones. In addition, the product allows you to transfer data at 480 Mbps - you don't have to stop charging your equipment for the moment.

Refined design

The cable has a Mcdodo-developed MSD chip, which allows you to inform about the charging process in real time from the display. What's more, the use of aluminum alloy and nylon braid ensures resistance to damage, including bending or cracking. In turn, the copper cable guarantees smooth charging of devices.
