

Wireless Gaming Mouse Darmoshark GN1 (PMW3335)

Ref: 6953460506381

Wireless Gaming Mouse Darmoshark GN1 (PMW3335)

Darmoshark GN1 Wireless Gaming Mouse (PMW3335)

The Darmoshark GN1 Wireless Gaming Mouse uses an advanced PMW3335 optical sensor and provides a maximum resolution of 16,000 DPI for accurate tracking and quick reactions. With two modes of operation (wired and wireless), the device adapts to any situation, ensuring reliability and comfort.

Ergonomic, lightweight design

The Darmoshark GN1 mouse is designed for long gaming sessions. With its ergonomic design and light weight (79g), you can play comfortably for hours. High-quality materials, such as durable ABS plastic and wear-resistant Teflon pads, ensure long life.

A reliable gaming companion

The GN1 is equipped with switches with a lifespan of up to 20 million clicks to ensure durability. The adjustable DPI (from 400 to 16,000) allows you to customize the sensitivity. In addition, the mouse provides fast response times thanks to its adjustable reporting frequency (125Hz, 500Hz, 1000Hz).

Two ways to connect

You decide how you want to play. The Darmoshark GN1 mouse can operate in both wired and wireless modes (within a range of up to 10

meters). The connection is stable thanks to a high-quality 2.4G transmitter and receiver.

Energy efficiency

The Darmoshark GN1 is equipped with a 700mA rechargeable battery that provides up to 70 hours of operation on a single charge. Intelligent power management, including various power saving modes and fast charging via USB-C port, ensure long-lasting performance.
