

## Lubluelu SL60D Cleaning Robot (Black)

Lubluelu SL60D Cleaning Robot (Black)

Ref: 6977335210036

Lubluelu SL60D cleaning robot (Black).

The Lubluelu SL60D robot will clean your home for you. The device can not only vacuum the floor while providing a suction power of 4,000 Pa, but also wet-clean it. Thanks to its LiDAR navigation system, it will easily find its way around any room, and it has a run time of up to 120 minutes. What's more, using the app, you can conveniently manage maps, create forbidden zones, set cleaning schedules and much more.

### Efficient work

The robot's suction power reaches up to 4,000 Pa, which means that the device can easily handle dust, crumbs and even hair. It will be perfect for almost any home! What's more, its volume level is only about 54 dB - don't be afraid of annoying noise. When cleaning, the vacuum cleaner moves along a zigzag-shaped path, so it eliminates dirt thoroughly and does not skip any areas. It can also automatically increase the suction power on carpets. All this will allow you to enjoy pristine floors throughout your home!

### It will clean the floors for you

The SL60D can not only vacuum your floors, but also mop them. The device offers 3 levels of water flow to choose from, allowing you to adjust its operation to your individual needs or the degree of dirtiness of the surface. In addition, an electronic pump controls the robot's operation and prevents leaks. Forget about unsightly stains on your floor!

#### Convenient control

The robot is compatible with the Smartlife / Tuya app, with which you can manage cleaning, edit room maps and more. Don't want the device to have access to a certain place in the house, for example, your child's room? Create a forbidden zone there! In addition, the SL60D works with Google Assistant and Amazon Alexa voice assistants. So you can control it with simple commands - no need to reach for your phone every time.

#### Powerful battery

Thanks to its 2600 mAh battery, a fully charged SL60D robot can run for up to 120 minutes. This means that it will work great in both small and large homes. You also don't have to remember to charge it. When the device's energy level drops to 15%, it will automatically return to its station, and when it charges to 80%, it will continue cleaning from where it left off.

#### Advanced navigation

The SL60D robot uses an advanced LiDAR navigation system with a scanning range of up to 8 meters. So it can freely navigate through most rooms. The device also has built-in sensors that prevent it from colliding with furniture and falling down stairs. However, the capabilities don't end there. The SL60D easily clears obstacles up to 18 mm, and with its 9.4 cm height, it will easily vacuum the floor under a bed or couch.

#### Improved brush design

Enjoy even more efficient cleaning. The robot is equipped with a specially designed brush with an improved design, which is perfect for different types of floors and allows you to effectively eliminate even stubborn dirt. It's also very easy to clean - it won't give you any trouble.

#### Included

Cleaning robot
