

Lubluelu SL60 Plus Cleaning Robot (Black)

Lubluelu SL60 Plus Cleaning Robot (Black)

Ref: 6977335210050

Lubluelu SL60 Plus cleaning robot (Black).

Provide yourself with a device that will relieve you of household chores. The Lubluelu SL60 Plus cleaning robot thoroughly vacuums and mops floors, and thanks to the included station, it automatically empties its waste tank. It also stands out for its suction power of 4,000 Pa, and its working time reaches 120 minutes. The device also uses an advanced LiDAR navigation system and is compatible with the Smartlife / Tuya app.

Automatic dust container emptying

You no longer have to get your hands dirty or waste time manually emptying the robot's dust tank. The SL60 Plus will do it for you! It includes a special emptying station, which features a suction power of 30,000 Pa, so it sucks up dirt in no time. The capacity of its garbage bag is as much as 2.5 liters - it's big enough to replace it only once every 60 days.

It will quickly deal with dirt

Say goodbye to omnipresent dirt. The SL60 Plus robot is equipped with a powerful brushless motor and offers a suction power of up to 4,000 Pa. This allows it to quickly and effectively remove dust, crumbs and dander! The device also allows you to choose from 3 levels of suction, so you can adjust its operation to your expectations. But the possibilities don't end there - the robot is able to automatically increase its power on carpets for even more thorough cleaning.

Clean and shiny floor

The SL60 Plus robot will also take care of wet floor cleaning. The device lets you choose from 3 levels of water flow and can mimic hand mopping, so it removes even stubborn stains with ease. Forget about dog's footprints from mud and spilled drinks! What's more, the robot uses a high-end electronic pump to control its operation and prevent leaks.

It will work well in any home

Thanks to advanced sensors, you don't have to worry about the robot getting stuck somewhere, falling down the stairs or colliding with furniture. What's more, the device uses an improved LiDAR navigation system, which features a range of up to 8 meters and high precision. This allows it to quickly scan rooms and create accurate maps. The SL60 Plus follows a zigzag-shaped path, and can double-clean (back and forth) in rooms of up to 10 m². All this makes it effortless to eliminate most stubborn dirt, such as dust and hair.

Control with the app and more

Thanks to its compatibility with the Smartlife / Tuya app, operating the robot is extremely simple and convenient. Use it to, for example, plan a work schedule, enable spot or along-edge cleaning, change settings, customize cleaning for a specific area, create a forbidden zone and more. The device is also compatible with the Amazon Alexa assistant, so you can control it with your voice. Now, with just a few words, the robot will get down to cleaning - you don't even need to have your phone with you.

Long runtime, automatic charging

The powerful 2600 mAh battery provides up to 120 minutes of uninterrupted robot operation. This makes the SL60 Plus an ideal choice for both small and large homes! You also don't have to remember to charge it. When the battery power drops to 15%, the device will automatically return to its station, and once it has renewed energy, it will simply continue cleaning from where it left off.

Included

Cleaning robot
2-in-1 dust and water tank
Charging station
Trash bag
Mopping pad
Power adapter
Side brush
Extra HEPA filter
Cleaning tool
User manual

Manufacturer: Lublu
Model: SL60 Plus
Suction power: 4000 Pa
Power: 42 W
Number of water flow levels: 3
Number of suction levels: 3
Operating time: Up to 120 min
Capacity of dust container: 200 ml
Water tank capacity: 250 ml
Mopping: Yes
Self-cleaning function: No
Navigation system: LiDAR
Battery capacity: 2600 mAh
Charging time: Approximately 4-5 h
Volume level: Approx. 55 dB
Filter type: HEPA H11
Weight: 7.9 kg
Application: Smartlife / Tuya
