

## Dash camera Hikvision C200S WiFi 2K 1800P

Ref: 6942160465852

Dash camera Hikvision C200S WiFi 2K 1800P

Hikvision C200S WiFi 2K 1800P video recorder

Want to increase your safety on the road and capture every important moment while driving? The Hikvision C200S video recorder is an advanced device that provides excellent image quality and reliability in all conditions. Thanks to its functionality and ease of use, it is ideal for all drivers who value peace of mind and safety. In the set you will find a front and rear camera.

Unparalleled image quality

The Hikvision C200S video recorder captures images in high 1080P resolution for exceptional clarity and detail in the recordings. With a wide 101° horizontal and 121° diagonal viewing angle, it captures everything going on around you, eliminating blind spots and increasing your safety. The large F2.0 aperture allows you to capture clear images even in low-light conditions, which is invaluable when driving at night.

Smart safety features

Equipped with an advanced G-Sensor module, the video recorder automatically starts recording if a collision or strong shock is detected. What's more, it is possible to configure it so that recordings are not overwritten. This ensures that they will be available when you need them. This feature enhances your safety by providing evidence in the event of an accident.

#### Voice recognition

The Hikvision C200S video recorder is equipped with an advanced voice recognition function that allows you to control the device with simple commands in English (it does not support Polish). You can turn the screen on or off, start or stop audio recording, and switch between the front and rear cameras without touching the device. This feature not only makes you more comfortable, but also improves driving safety by letting you focus on the road. This gives you full control over the video recorder, regardless of the situation on the road.

#### Easy transfer and management of recordings

The WiFi module in the Hikvision C200S video recorder allows you to easily transfer recordings to your mobile devices. With a smartphone app, you can manage recordings, view them in real time and configure the device's parameters. This extremely convenient solution allows you to quickly share recordings and easily manage all functions of the video recorder.

#### Long-lasting recording

The video recorder supports TF cards with a capacity of up to 256GB, allowing you to record for a long time without having to empty the memory frequently. The overwrite function allows you to automatically delete the oldest recordings, providing space for new files. This practical solution ensures that you always have access to up-to-date recordings.

#### Intuitive operation and installation

The Hikvision C200S is designed for easy installation and use. The plug-and-play installation and automatic recording upon power-up make the device ready to use in a matter of moments. The user-friendly interface and convenient controls provide convenience for everyday use.
